| Product Description        | 3-(1-Azepanyl)-1-propanamine refinement of structural leads for centrally acting oxime reactivators of phosphylated cholinesterases. Molecular Formula: C <sub>9</sub> H <sub>20</sub> N <sub>2</sub> Solubility: Chloroform (Slightly), Methanol (Slightly) Molecular Weight: 156.27000000000000... |
| Molecular Weight           | 156.27                                                                                                                                                                                                                                                                                               |
| Form                       | Supplied as a Clear Colorless Oil                                                                                                                                                                                                                                                                    |
