| Alternative Catalog Number | USB-423686-50,USB-423686-100                                                                                                                                                                                                                                                                         |
| Manufacturer               | US Biological                                                                                                                                                                                                                                                                                        |
| Category                   | Biochemikalien                                                                                                                                                                                                                                                                                       |
| Product Description        | 3-Amino-2-chloropyridine is used as a reactant in the synthesis of arylisoindoline-diones as anticonvulsant agents Molecular Formula: C <sub>5</sub> H <sub>5</sub> ClN <sub>2</sub> Molecular Weight: 128.56 Storage and Stability: Store at -20°C. For maximum recovery of product, centrifuge ... |
| Molecular Weight           | 128.56                                                                                                                                                                                                                                                                                               |
| CAS Number                 | [6298-19-7]                                                                                                                                                                                                                                                                                          |
