| Product Description        | Dylight 488 can be used to visualize the binding pattern of Datura stramonium Lectin (DSA/DSL) in cellular imaging and flow cytometry. DyLight 488 is a green-fluorescent dye that works over a broad pH range (pH 4-9). It is brighter and more photostab... |
| Form                       | Supplied as a liquid in PBS, 0.02% sodium azide. Labeled with DyLight488.                                                                                                                                                                                     |
