| Product Description        | 3-Methylcrotonic acid is used as a starting material to synthesize 3-Methylcrotonyl-CoA, an intermediate in the metabolism of Leucine. Molecular Formula: C <sub>5</sub> H <sub>8</sub> O <sub>2</sub> Molecular Weight: 100.12 Storage and Stability: Store at -20C. For maximum recovery of pr... |
| Molecular Weight           | 100.12                                                                                                                                                                                                                                                                                              |
