| Category                   | Biochemikalien                                                                                                                                                                                                                                                                          |
| Product Description        | 3,4-Dimethoxy-2-methylpyridine-N-oxide can be used for one pot synthesis of 2-[2-(pyridylmethyl)thio]-1H-benzimidazoles, which are intermediates for preparing H <sup>+</sup> /K <sup>+</sup> -ATPase inhibitors. 3,4-Dimethoxy-2-methylpyridine-N-oxide is an impurity of Pantopraz... |
| Molecular Weight           | 169.18                                                                                                                                                                                                                                                                                  |
