| Product Description        | 4-((4-(Allyloxy)phenyl)sulfonyl)phenol is an additive to enhance the flame-retardation of unsaturated polyester resin (FR-UPR). Molecular Formula: C <sub>15</sub> H <sub>14</sub> O <sub>4</sub> S Solubility: Chloroform (Slightly, Heated), DMSO (Slightly), Methanol (Slightly) Molecular Wei... |
| Molecular Weight           | 290.33                                                                                                                                                                                                                                                                                               |
| Form                       | Supplied as a Off-White Solid                                                                                                                                                                                                                                                                        |
