| Product Description        | 5-Bromo-2-iodobenzaldehyde is a useful synthetic intermediate. It is used to prepare aza-fused polycyclic quinolines via copper-catalyzed cascade intermolecular condensation. It is also used in the synthesis of oxoindenopyrroles via copper-catalyzed ... |
| Molecular Weight           | 310.91                                                                                                                                                                                                                                                        |
