| Product Description        | 5-Chloro-2-(chloromethyl)pyrimidine is used as a reagent in the synthesis of fused benzoxazepinones as ion channel modulators. Molecular Formula: C <sub>5</sub> H <sub>4</sub> Cl <sub>2</sub> N <sub>2</sub> Molecular Weight: 163 Storage and Stability: Store at -20C. For maximum recovery of product, c... |
| Molecular Weight           | 163                                                                                                                                                                                                                                                                                                              |
