| Product Description        | 5-methoxy-2-naphthalenecarbonitrile is used in the preparation of N-(azabicyclyl)arylamides for therapeutic use as nicotinic acetylcholine receptor agonists. Molecular Formula: C <sub>12</sub> H <sub>9</sub> NO Molecular Weight: 183.21 Storage and Stability: Store at -20C. Fo... |
| Molecular Weight           | 183.21                                                                                                                                                                                                                                                                                  |
