| Product Description        | 5,5-Diiodo-2,2-dimethylbiphenyl acts as a reagent in the synthesis of host materials for blue phosphorescent organic light emitting diodes. Molecular Formula: C <sub>14</sub> H <sub>12</sub> I <sub>2</sub> Molecular Weight: 434.05 Storage and Stability: Store at -20C. For maximum recover... |
| Molecular Weight           | 434.05                                                                                                                                                                                                                                                                                              |
