| Product Description        | Borane-pyridine Complex is a reactant used in the synthesis of luminescent materials or clay sensors. Molecular Formula: C <sub>5</sub> H <sub>8</sub> BN<br>Solubility: Chloroform (Slightly), Methanol (Slightly) Molecular Weight: 92.93 Storage and Stability: Store at -20C. For m... |
| Molecular Weight           | 92.93                                                                                                                                                                                                                                                                                      |
| Form                       | Supplied as a Clear Light Yellow Oil                                                                                                                                                                                                                                                       |
