| Product Description        | d-alpha-Tocopheryl Retinoate is a wound healing promoter and has neoplasm inhibiting activity. Molecular Formula: C <sub>49</sub> H <sub>76</sub> O <sub>3</sub><br>Molecular Weight: 713.13 Storage and Stability: Store at -20C. For maximum recovery of product, centrifuge the original vial pr... |
| Molecular Weight           | 713.13                                                                                                                                                                                                                                                                                                 |
