| Product Description        | Dimethyl N,N-Diisopropylphosphoramidite-d6 is an isotope labelled reagent for the efficient phosphorylation of alcohols. Molecular Formula: C <sub>8</sub> H <sub>14</sub> D <sub>6</sub> NO <sub>2</sub> P Solubility: Chloroform, DCM, Ether Molecular Weight: 199.26 Storage and Stability: Store at -20C. ... |
| Molecular Weight           | 199.26                                                                                                                                                                                                                                                                                                            |
