| Product Description        | Ethyl Cis-3-iodoacrylate is a reactant used in the synthesis of complex naphtho(benzo)furans as well as in the cobalt-catayzed cross coupling of functionalized organozinc pivalates. Molecular Formula: C <sub>5</sub> H <sub>7</sub> IO <sub>2</sub> Solubility: Chloroform, Ethyl Acetate (SI... |
| Molecular Weight           | 226.01                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a Clear Colorless Oil                                                                                                                                                                                                                                                                   |
