| Product Description        | N-[1-Oxo-2-(phenylmethyl)-2-propenyl]glycine is an intermediate in the synthesis of Racecadotril related compounds with antidiarrheal properties. Molecular Formula: C <sub>12</sub> H <sub>13</sub> NO <sub>3</sub> Solubility: DCM. Ethyl Acetate Molecular Weight: 219.24 Storage and Stabili... |
| Molecular Weight           | 219.24                                                                                                                                                                                                                                                                                              |
| Form                       | Supplied as a Yellow Oil                                                                                                                                                                                                                                                                            |
