| Product Description        | Frizzled10 (FZD10) is also known as FzE7 or CD350, which belongs to the Gprotein coupled receptor Fz/Smo family. Most of frizzled receptors are coupled to the betacatenin canonical signaling pathway, which leads to the activation of disheveled protei... |
| Molecular Weight           | 18.0 kDa                                                                                                                                                                                                                                                      |
