| Product Description        | Lansoprazole sulfone (AG-1813)-d4 is the deuterium labeled Lansoprazole sulfone (HY-W008614). Lansoprazole sulfone, Lansoprazole (HY-13662) metabolite, is a H <sup>+</sup> , K <sup>+</sup> -ATPase inhibitor. Lansoprazole sulfone has potential applications in duodenal ulcer, g... |
| Molecular Weight           | 389.39                                                                                                                                                                                                                                                                                  |
