| Product Description        | Acenocoumarol-d4 is deuterium labeled Acenocoumarol (HY-B1014). Acenocoumarol is an anticoagulant that functions as a Vitamin K antagonist. Acenocoumarol inhibits MAPK/ERK/JNK signaling pathway, reduces the nuclear translocation of NF-kappaB p65, act... |
| Molecular Weight           | 357.35                                                                                                                                                                                                                                                        |
