Application Notes

Biological Origin: Homo sapiens (Human). Biological Activity: FACS assay shows that Human PVR can bind to HEK293F cell overexpressing human TIGIT. Application Notes: We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference
