Application Notes

Application Notes: The peptide sequence used (from AAK15343.1) differs by one residue from the RefSeq entry (XP\_931107.2). It is not known whether this difference is due to a sequencing error or polymorphism but the antibody is expected to recognize both sequences.ELISA: Peptide ELISA: antibody detection limit dilution 1:32000.WB: No signal obtained yet but low background observed in human testis and 293 lysates at up to 1 µg/ml. We would appreciate any feedback from people in the field - have any results been reported with other antibodies/lysates
