| Category                   | Proteine/Peptide                                                                                                                                                                                                                                                |
| Species Reactivity         | Human                                                                                                                                                                                                                                                           |
| Product Description        | Human CXCR2 full length protein-synthetic nanodisc...                                                                                                                                                                                                           |
| Molecular Weight           | The human full length CXCR2 protein has a MW of 40.8 kDa                                                                                                                                                                                                        |
| UniProt                    | <a href="#">P25025</a>                                                                                                                                                                                                                                          |
| Form                       | Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with pH lowe |
| Target                     | CXCR2                                                                                                                                                                                                                                                           |
