| Category                   | Proteine/Peptide                                                                                                                                                                                                                                                |
| Species Reactivity         | Human                                                                                                                                                                                                                                                           |
| Product Description        | Human CCR2 full length protein-synthetic nanodisc...                                                                                                                                                                                                            |
| Molecular Weight           | The human full length CCR2 protein has a MW of 41.9 kDa                                                                                                                                                                                                         |
| UniProt                    | <a href="#">P41597</a>                                                                                                                                                                                                                                          |
| Form                       | Lyophilized from nanodisc solubilization buffer (20 mM Tris-HCl, 150 mM NaCl, pH 8.0). Normally 5% - 8% trehalose is added as protectants before lyophilization. Please see Certificate of Analysis for specific instructions. Do not use solvents with pH lowe |
| Target                     | CCR2                                                                                                                                                                                                                                                            |
