| Manufacturer               | Biorbyt                                                                                                                                                                               |
| Category                   | Proteine/Peptide                                                                                                                                                                      |
| Product Description        | ACE2/ACEH Protein, Human, Recombinant (hFc) is expressed in HEK293 mammalian cells with hFc tag. The predicted molecular weight is 110.3 kDa and the accession number is Q9BYF1-1.... |
| Molecular Weight           | 110.3 kDa (predicted), 145-150 kDa (reducing condition, due to glycosylation)                                                                                                         |
| UniProt                    | <a href="#">Q9BYF1</a>                                                                                                                                                                |
| Source                     | Human                                                                                                                                                                                 |
| Application Notes          | Biological Origin: Human                                                                                                                                                              |
