### Recombinant Human VHL Protein, E. coli ABB-RP02813

|                            |                                                                     |
|----------------------------|---------------------------------------------------------------------|
| Article Name               | Recombinant Human VHL Protein, E. coli                              |
| Biozol Catalog Number      | ABB-RP02813                                                         |
| Supplier Catalog Number    | RP02813                                                             |
| Alternative Catalog Number | ABB-RP02813-20UG                                                    |
| Manufacturer               | ABclonal                                                            |
| Host                       | E. coli                                                             |
| Category                   | Proteine/Peptide                                                    |
| Species Reactivity         | Human                                                               |
| Immunogen                  | Met1-Asp213                                                         |
| Concentration              | Please contact us for more information.                             |
| Molecular Weight           | 27.5 kDa                                                            |
| NCBI                       | <a href="#">7428</a>                                                |
| UniProt                    | <a href="#">P40337</a>                                              |
| Purity                     | 75 % as determined by SDS-PAGE.                                     |
| Form                       | Lyophilized from a 0.22 µm filtered solution of 50 mM Tris, pH 7.5. |
| Target                     | VHL                                                                 |
| Application Dilute         | Lyophilized from a 0.22 µm filtered solution of 50 mM Tris, pH 7.5. |

Application Notes

Cross-Reactivity: Centrifuge the vial before opening. Reconstitute to a concentration of 0.1-0.5 mg/mL in sterile distilled water. Avoid vortex or vigorously pipetting the protein. For long term storage, it is recommended to add a carrier protein or stabilizer (e.g. 0.1% BSA, 5% HSA, 10% FBS or 5% Trehalose), and aliquot the reconstituted protein solution to minimize free-thaw cycles., Research Area: Cytokines & Cytokine receptors
