| Category                   | Biochemikalien                                                                                                                                                                                                                     |
| Product Description        | KSA01 is a two-dimensional fluorescent probe. KSA01 can detect SA-beta-gal activity and sense lysosomal pH. KSA01 can accurately distinguish cellular aging from other pathological states with high expression of beta-gal[1].... |
| Molecular Weight           | 640.52                                                                                                                                                                                                                             |
| Formula                    | C32H34BrNO8                                                                                                                                                                                                                        |
| Target                     | Fluorescent Dye                                                                                                                                                                                                                    |
| Application Notes          | MCE Product type: Dye Reagents                                                                                                                                                                                                     |
