| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Janus kinase 2 (JAK2) initiates signaling from several cytokine receptors and is required for biological responses such as erythropoiesis. JAK2 contains the kinase (JH1) and pseudokinase domains (JH2). JAK2(JH1/JH2) Recombinant Human Active Protein K... |
| Target                     | JAK                                                                                                                                                                                                                                                           |
