| Immunogen                  | Recombinant Dengue virus NS1, a mixture of serotypes 1-4.                                                                                                                                                                                                     |
| Product Description        | The NS1 protein is a major non-structural protein expressed by the Dengue Virus. The NS1 monomer is a glycosylated protein of approximately 45kD, which associates with lipids and forms a homotrimer inside infected cells. It is necessary for viral rep... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Concentration              | Batch dependent. 1.5mg/ml.                                                                                                                                                                                                                                    |
| Clone Designation          | [JE1.C10.H2.A9]                                                                                                                                                                                                                                               |
| Isotype                    | IgG1                                                                                                                                                                                                                                                          |
