| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Species Reactivity         | Bovine                                                                                                                                                                                                                                                        |
| Product Description        | This ELISA kit uses the Competitive-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with Bovine IgG2. During the reaction, Bovine IgG2 in the sample or standard competes with a fixed amount of Bovine IgG2 on the solid ... |
| Range                      | 246.9-20000ng/mL                                                                                                                                                                                                                                              |
| Sensitivity                | 97.3ng/mL                                                                                                                                                                                                                                                     |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | IgG2                                                                                                                                                                                                                                                          |
