| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Product Description        | This ELISA kit uses the Sandwich-ELISA principle. The micro ELISA plate provided in this kit has been pre-coated with an antibody specific to Human RGC32. Standards or samples are added to the micro ELISA plate wells and combined with the specific an... |
| Range                      | 0.31-20ng/mL                                                                                                                                                                                                                                                  |
| Sensitivity                | 0.115ng/mL                                                                                                                                                                                                                                                    |
| Samples                    | Serum,plasma and other biological fluids                                                                                                                                                                                                                      |
| Target                     | RGC32                                                                                                                                                                                                                                                         |
