| Product Description        | EphrinA4 (EFNA4) is also known as EPHrelated receptor tyrosine kinase ligand 4 (LERK4), EPLG4, which belongs to the ephrin family. EFNA4 contains one ephrin RBD (ephrin receptorbinding) domain. EFNA4 is cell surface GPIbound ligand for Eph receptors,... |
| Molecular Weight           | 17.5 kDa                                                                                                                                                                                                                                                      |
| Tag                        | C-8*His                                                                                                                                                                                                                                                       |
