| Product Description        | MIS RII (Mullerian inhibiting substance type II receptor), also known as AMHRII (antiMullerian hormone type II receptor), is a serine/threonine receptor with a single transmembrane domain that belongs to the family of type II receptors of the TGFbeta... |
| Molecular Weight           | 41.3 kDa                                                                                                                                                                                                                                                      |
| Tag                        | C-LlamaFc(LlamaIgG2b)                                                                                                                                                                                                                                         |
