| Conjugation                | Unconjugated                                                                                                                                                                                                           |
| Concentration              | 0.20 mg/ml (Please refer to the vial label for the specific concentration.)                                                                                                                                            |
| NCBI                       | <a href="#">1234</a>                                                                                                                                                                                                   |
| Buffer                     | PBS, 0.1% BSA, 0.02% Sodium azide.                                                                                                                                                                                     |
| Form                       | Liquid                                                                                                                                                                                                                 |
| Application Notes          | The peptide is used for blocking the activity of anti-CCR5 (GTX27346). Incubating the peptide with equal volume of antibody for 30 min at 37C usually completely blocks the activity of anti-CCR5 in Western blotting. |
