| Category                   | Antikörper                                                                                                                                                                                                                                                    |
| Application                | ELISA, WB                                                                                                                                                                                                                                                     |
| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Immunogen                  | Synthetic peptide. This information is considered to be commercially sensitive.                                                                                                                                                                               |
| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | The protein encoded by this gene is a negatively-charged serum glycoprotein that is synthesized by hepatocytes. The encoded protein consists of two polypeptide chains, which are both cleaved from a proprotein encoded from a single mRNA. It is involve... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | 39kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">197</a>                                                                                                                                                                                                                                           |
| UniProt                    | <a href="#">P02765</a>                                                                                                                                                                                                                                        |

|                    |                                                                                                                                                                          |
|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purity             | Affinity purification                                                                                                                                                    |
| Target             | AHSG                                                                                                                                                                     |
| Application Dilute | WB,1:500 - 1:1000 ELISA,Recommended starting concentration is 1 µg/mL. Please optimize the concentration based on your specific assay requirements.                      |
| Application Notes  | Cross-Reactivity: Human. ResearchArea: Endocrine Metabolism,Endocrine and metabolic diseases,Obesity,Neuroscience,Cardiovascular,Blood,Serum Proteins. Shipping: Ice Bag |
