| Conjugation                | Unconjugated                                                                                                                                                                                                                                                  |
| Product Description        | This gene is a member of the Antp homeobox family and encodes a nuclear protein with a homeobox DNA-binding domain. It is included in a cluster of homeobox B genes located on chromosome 17. The encoded protein functions as a sequence-specific transcr... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                    |
| Molecular Weight           | 28kDa                                                                                                                                                                                                                                                         |
| NCBI                       | <a href="#">3214</a>                                                                                                                                                                                                                                          |
