| Conjugation                | PE                                                                                                                                                                                                                                          |
| Product Description        | Receptor for thyrothropin. Plays a central role in controlling thyroid cell metabolism. The activity of this receptor is mediated by G proteins which activate adenylate cyclase. Also acts as a receptor for thyrostimulin (GPA2+GPB5).... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                  |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                      |
