| Product Description        | Glycosylation of asparagine residues in Asn-X-Ser/Thr motifs in proteins commonly occur in the lumen of the endoplasmic reticulum (ER). Glucosidase I catalyzes the first step in the N-linked oligosaccharide processing pathway. It specifically removes... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
