| Product Description        | G protein-coupled receptors (GPRs), also known as seven transmembrane receptors, heptahelical receptors or 7TM receptors, comprise a superfamily of proteins that play a role in many different stimulus-response pathways. GPR signaling is an evolutiona... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
