| Product Description        | FIBIN (Fin bud initiation factor homolog) is a 211 amino acid protein involved in fin initiation in zebrafish. The human homolog is encoded by a gene that maps to chromosome 11, which makes up around 4% of human genomic DNA and is considered a gene a... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
