| Conjugation                | BF680                                                                                                                                                                                                                                                          |
| Product Description        | Riboflavin transporter. Riboflavin transport is Na(+)-independent but moderately pH-sensitive. Activity is strongly inhibited by riboflavin analogs, such as lumiflavin. Weakly inhibited by flavin adenine dinucleotide (FAD) and flavin mononucleotide (...) |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                     |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                                         |
