| Species Reactivity         | Human                                                                                                                                                                                                                            |
| Conjugation                | BF350                                                                                                                                                                                                                            |
| Product Description        | This enzyme is involved in nucleotide metabolism: it produces dUMP, the immediate precursor of thymidine nucleotides and it decreases the intracellular concentration of dUTP so that uracil cannot be incorporated into DNA.... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                       |
| Concentration              | 1ug/ul                                                                                                                                                                                                                           |
