| Conjugation                | BF647                                                                                                                                                                                                                                                          |
| Product Description        | This endogenous retroviral envelope protein has retained its original fusogenic properties and participates in trophoblast fusion and the formation of a syncytium during placenta morphogenesis. May induce fusion through binding of SLC1A4 and SLC1A5 (...) |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                     |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                                         |
