| Conjugation                | BF405                                                                                                                                                                                                                                                         |
| Product Description        | This gene is a proto-oncogene that encodes a RING finger E3 ubiquitin ligase. The encoded protein is one of the enzymes required for targeting substrates for degradation by the proteasome. This protein mediates the transfer of ubiquitin from ubiquiti... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
