| Conjugation                | Unconjugated                                                                                                                     |
| Tag                        | N-MBP & C-His                                                                                                                    |
| UniProt                    | <a href="#">P48546</a>                                                                                                           |
| Buffer                     | 150 mM PBS(pH 7.4)                                                                                                               |
| Source                     | Recombinant human GIPR Protein is expressed in HEK293 cell with N-MBP & C-His. It contains the amino acid sequence of 22-138/466 |
| Expression System          | HEK293                                                                                                                           |
| Purity                     | > 85% as determined by SDS-PAGE                                                                                                  |
