| Product Description        | By generating PPI, plays a role in regulating pyrophosphate levels, and functions in bone mineralization and soft tissue calcification. PPI inhibits mineralization by binding to nascent hydroxyapatite (HA) crystals, thereby preventing further growth ... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
