| Conjugation                | Cy5                                                                                                                                                                                                                                                           |
| Product Description        | Polymerase that creates the 3-poly(A) tail of mRNAs. Also required for the endoribonucleolytic cleavage reaction at some polyadenylation sites. May acquire specificity through interaction with a cleavage and polyadenylation specificity factor (CPSF) ... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                                        |
