| Application                | IF, WB                                                                                                                                                                                                   |
| Conjugation                | Cy5                                                                                                                                                                                                      |
| Product Description        | PGLS belongs to the glucosamine/galactosamine-6-phosphate isomerase family, 6-phosphogluconolactonase subfamily. It is implicated in the hydrolysis of 6-phosphogluconolactone to 6-phosphogluconate.... |
| Clonality                  | Polyclonal                                                                                                                                                                                               |
| Concentration              | 1ug/ul                                                                                                                                                                                                   |
| NCBI                       | <a href="#">25796</a>                                                                                                                                                                                    |
| Buffer                     | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                  |
| Source                     | KLH conjugated synthetic peptide derived from human PGLS                                                                                                                                                 |
| Target                     | PGLS                                                                                                                                                                                                     |

|                    |                                                                                |
