| Conjugation                | Cy7                                                                                                                                                                                                                                                           |
| Product Description        | The tripartite motif (TRIM) family of proteins are characterized by a conserved TRIM domain that includes a coiled-coil region, a B-box type zinc finger, one RING finger and three zinc-binding domains. TRIM8 (tripartite motif containing 8), also know... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
