| Species Reactivity         | Human                                                                                                                                                                                                                                                         |
| Conjugation                | APC/Cy7                                                                                                                                                                                                                                                       |
| Product Description        | A SLe(x)-type proteoglycan, which through high affinity, calcium-dependent interactions with E-, P- and L-selectins, mediates rapid rolling of leukocytes over vascular surfaces during the initial steps in inflammation. Critical for the initial leukoc... |
| Clonality                  | Recombinant                                                                                                                                                                                                                                                   |
| Concentration              | Lot dependent                                                                                                                                                                                                                                                 |
