| Conjugation                | PE                                                                                                                                                                                                                                                            |
| Product Description        | Binds specifically to cytosolic chaperonin (c-CPN) and transfers target proteins to it. Binds to nascent polypeptide chain and promotes folding in an environment in which there are many competing pathways for nonnative proteins. Represses the transcr... |
| Clonality                  | Recombinant                                                                                                                                                                                                                                                   |
