| Conjugation                | BF680                                                                                                                                                                                                                                                          |
| Product Description        | Protein phosphatase that inactivates multifunctional CaM kinases such as CAMK4 and CAMK2. Dephosphorylates and inactivates PAK. May play a role in the inhibition of actin fiber stress breakdown and in morphological changes driven by TNK2/CDC42. Dephos... |
| Clonality                  | Recombinant                                                                                                                                                                                                                                                    |
| Concentration              | Lot dependent                                                                                                                                                                                                                                                  |
